LOVE SPACE TO UNWIND LIVE TO SHAPE THAT SPACE

The interior of every Miller's Glen home is built with you in mind. Whatever you want, space for the kids to play, a place to work from or more room to entertain friends, each home offers all the flexibility you will need.

The comfort you want, how you want it

Space and light help you to bring the plans for your home to life. Our designers factor real furniture sizes into each home's layout to make furnishing your home to your taste a far easier process.

A-Rated Specs and Standards

If it isn't A-rated, then it isn't a Glenveagh home. Each property of ours performs at the highest possible level on the BER efficiency scale — exhibiting the highest standards of insulation and airtightness.

LOVE THE FUTURE OF COMFORT LIVE WITH EFFICIENT TECHNOLOGIES

The efficiency of a home isn't something that's just felt in your back pocket, but through the comfort and warmth you experience every day. All Glenveagh homes are built using modern construction techniques and technology that benefits you, the owner.

Our homes are built to be energy efficient with a minimum A rating on the BER scale with the highest standards of insulation and airtightness in all our properties.

What do homes of the future look like?

We're building the homes of tomorrow, today. We incorporate sustainable and renewable technology to reduce the carbon footprint of your home, not only in how it's built, but in how you experience it from the day you move in.

Why is an airtight home a better choice?

Efficiency and sustainability aren't simply about generating heat or the energy you use in your home; it's about retaining it and keeping it in. Your home is completely wrapped using the very latest underfloor, wall and attic insulation technology, making it airtight so there's no air leakage. Glenveagh homes use sophisticated ventilation systems to remove condensation and contaminants to ensure a better quality of air throughout.

How a heat pump works for your home

A heat pump costs a lot less to run than gas or oil, and is a far more efficient way to heat a home.

A heat pump system draws heat from different sources: air, water, or the ground. The heat generated is then distributed throughout the home, and because your home is airtight and uses better insulation it takes less energy to create a comfortable space.

Pre-wiring for electric vehicles

Even if your current car isn't an electric or hybrid model, you may decide to switch in the future. That's why provisions for the installation of an electric vehicle charge point are made where applicable, so your home is ready when you make the move to electric driving.
