

## Alterations made to Ground floor.

A generous extension has been added to the rear of the house to provide an extra two bedrooms, making it a four-bedroom property. This can be reduced to three bedrooms to allow for more garden area at the rear of the property by removing bedroom 3 and repositioning the back door.

Slit windows have been added to the south-facing side of the property for privacy, also to allow natural light into the bedrooms. The windows at the front of the house have been fitted with stained, frosted glass for privacy and natural light.

The master bedroom will have access to the garden by way of large patio doors.
