LOVE SPACE TO UNWIND LIVE TO SHAPE THAT SPACE

The interior of every Foggie Field home is built with you in mind. Whether you want space for the kids to play, a place to work from or more room to entertain friends, each home offers all the flexibility you will need.

The comfort you want, how you want it

Space and light help you to bring the plans for your home to life. Our designers factor in real furniture sizes into each home's layout to make furnishing your home to your taste a far easier process.

A-Rated Specs and Standards

Every Glenveagh property performs at the highest possible level on the BER efficiency scale — exhibiting the highest standards of insulation and airtightness.

LOVE FUTURE COMFORTS LIVE WITH EFFICIENT TECHNOLOGIES

The efficiency of a home isn't something that's just felt in your back pocket, but through the comfort and warmth you experience every day. All Glenveagh homes are built using modern construction techniques and technology that benefits you, the owner.

Our homes are built to be energy efficient to a minimum A rating on the BER scale, with the highest standards of insulation and airtightness in all our properties.

What do homes of the future look like?

We're building the homes of tomorrow, today. We incorporate sustainable and renewable technology to reduce the carbon footprint of your home, not only in how it's built, but in how you experience it from the day you move in. Developments in solar technology will mean that your home can generate its own energy, and in the future even contribute back to the national grid!

Thermal comfort

Efficiency and sustainability isn't simply about generating heat or the energy you use in your home; it's about retaining it and keeping it in. Your home is completely wrapped using the very latest underfloor, wall and attic insulation technology, making it perform thermally to the highest standards. Glenveagh homes are also designed to the highest possible standards in terms of airtightness and indoor air quality through carefully installed impermeable membranes and carefully designed ventilation systems.

How a heat pump works for your home

A heat pump costs a lot less to run than gas or oil, and is a far more efficient way to heat a home.

A heat pump system draws heat from different sources: air, water or the ground. The heat generated is then distributed throughout the home, and because your home is airtight and uses better insulation it takes less energy to create a comfortable space.

Pre-wiring for electric vehicles

Even if your current car isn't an electric or hybrid model, you may decide to switch in the future. That's why provisions for the installation of an electric vehicle charge point are made where applicable, so your home is ready when you make the move to electric driving.

Solar PV panels make a big difference

The latest solar panel technology can make a big difference to your home. Not simply in terms of sustainability but in cost savings too. By capturing natural light from the sun, photovoltaic panels on the roof of your home offer an environmentally friendly way to power your TV, kettle or toaster or Electric Vehicle!

LOVE INNOVATION LIVE IN A NEW HOME CONCEPT

Glenveagh has created an innovative new housing concept inspired by Irish community and integrated it into our Foggie Field offering.

Our new spatial approach and layout aims to deliver a renewed sense of community, where high quality public spaces create an environment where neighbours become friends.

Most importantly, this intelligent design incorporates everything modern homeowners hold important. Comfortable, light-filled dedicated spots for home-working, built in parking concealed from the street, a courtyard garden designed as an extension of your living room, relaxing upper floor terrace and of course, stylish own door access.

Whether you're a first-time buyer, downsizer or family, this new home design seamlessly integrates modern living, surrounded by public spaces and pedestrian-friendly streets for a shared and welcoming community.
